

```
main.c
7
8 void *writer()
9- {
10     sem_wait(&wrt);
11     data++;
12     printf("Writer writes: %d\n", data);
13     sem_post(&wrt);
14 }
15
16 void *reader()
17- {
18     sem_wait(&wrt);
19     printf("Reader reads: %d\n", data);
20     sem_post(&wrt);
21 }
22
23 int main()
24- {
25     pthread_t r, w;
26
27     sem_init(&wrt, 0, 1);
28
29     pthread_create(&w, NULL, writer, NULL);
30     pthread_create(&r, NULL, reader, NULL);
31
32     pthread_join(w, NULL);
33     pthread_join(r, NULL);
34
35     sem_destroy(&wrt);
36
37     return 0;
38 }
```

Output

```
Writer writes: 1
Reader reads: 1

=== Code Execution Successful ===
```
